

DataSync.net

For SuperOffice CRM

Transfer data automatically to and from SuperOffice CRM

DataSync.net is the ideal tool for transferring data to and from SuperOffice CRM. With the module you get a high level of data quality, a full overview of the customer and you are ensured that data only need to be entered in one place.

See all relevant data from the accountancy system in SuperOffice CRM

Why give access to all areas of the economy system, when the employees need access to data? With DataSync.net you can transfer data into SuperOffice CRM and make it visible but not editable for the user. You safeguard your data from being changed by accident by a user with no economy experience.

Automatic updates of addresses from accountancy system

Another feature you get by implementing DataSync.net is the cer-

tainty that your addresses are updated in both the accountancy system and SuperOffice CRM. You only have to update one place and the changes kick into SuperOffice CRM.

Get a full overview of the customer

With the ability to import data from the economy system to SuperOffice CRM you get the total overview of your customers in one place, SuperOffice CRM. This ensures a high level of customer satisfaction, as you are able to provide a better service.

Save money on purchase of licenses in the accountancy system

User licenses for accountancy systems tend to be quite expensive. With the ability to show data for your existing "light users" you can cut cost without reducing valuable information and tools for your staff.

See data directly in SuperOffice CRM from external systems

Often the most critical data comes from sources such as Excel spreadsheets and other databases. The standard DataSync.net can handle these sources. Apart from that unique adaptors for specific systems are being developed on a continued basis, which ensures you a product that will never get out of date.

Minimize loss on debtors

With increased focus on all aspects of the customer, you become proactive and can deal with situations before they become an issue. This ensures that you minimize your loss on customers.

Avoid duplicates in SuperOffice CRM

By synchronizing with the economy system you ensure that no customer is entered twice and that data is stored on the correct customer card.

DataSync.net is the first 3rd party product in the world to be certified by SuperOffice. The module meets the high criteria SuperOffice put forward for a certified module, which is your certainty that you get a module that will also meet your demands in the future!

SuperOffice Certified Product

SuperOffice Independent Software Vendor

SuperOffice assumes no responsibility for products developed by third party, used together with or in connection with SuperOffice CRM software. The solution provider shall identify and hold SuperOffice harmless from third party claims, from the use of SuperOffice products under these terms.
