

Taking your **SuperOffice** to the next level

Expander Design Suite

For SuperOffice CRM

Adapt SuperOffice CRM to the unique requirements for the company and make external information accessible to all.

With Expander Design Suite (EDS) the company gets the opportunity to adapt SuperOffice CRM to unique requirements. See data from the economy system regarding the customer in SuperOffice CRM, perform advanced searches in your external and internal SuperOffice CRM data, use SuperOffice CRM to control customer complaints or use to control the handling of the documents relating to a sale, from offer to invoice. The possibilities are endless.

Get the total overview of the company's external systems in SuperOffice

With EDS all types of data can be imported. All kinds of external data can be made visible in extra tabs in SuperOffice CRM.

It is also possible to expand SuperOffice with new internal data.

Combine effective searches with both SuperOffice data and data from the economy system

The built in search function in EDS gives an extremely valuable tool, as you get the opportunity to combine SuperOffice CRM data with external data. The combination of i.e. total sale, last sale and the contact card, gives the opportunity to identify cross sale opportunities at existing customers.

Adapt your SuperOffice CRM solution to your own unique requirements

EDS is the ideal opportunity to expand SuperOffice CRM to suit the company's unique requirements. Whether it is an invoice solution, displaying data from the economy system, expansion of the standard templates or displaying of data from an external database, EDS is the toolbox which can solve the task.

See the customers' invoice information in SuperOffice

Not all users need to use all the functions of the economy system. With EDS, SuperOffice CRM can be expanded to show specific economy data.

This type of import can lead to a saving on expensive licenses for the economy system and at the same time it is possible to choose which data the particular user should be able to view.

Designed to meet future requirement when buying new IT systems

EDS has no limitations in regards to data amount or sources, future expansions are unlimited. EDS is fully scaleable and data from new systems can be imported to SuperOffice CRM.

SAC Leasing is one of Denmark's largest leasing companies – an unconventional and innovative thinking leasing company, who lease and rent out cars to both large and small companies. SAC Leasing was founded in 2002 and employs more than 150 people today.

"It is obvious that a system like SuperOffice CRM demands a high level of data discipline. With our EDS solution sales representatives and the administrative personnel can understand the advantages an up-to-date database offers. After implementation of EDS and its possibilities to our organization, the CRM system is recognized as a help rather than a time consumer. The system have helped us to put focus on our data discipline."
